

aaron stone

SOFTWARE ENGINEER & PRODUCT BUILDER

aaron@bubble.graphics[857-231-1060](tel:857-231-1060)[NYC Metro](#)github.com/aaronstone2linkedin.com/in/aaron-stonev0-aaronstone.vercel.app

EXPERIENCE

Software Engineer, DevX — Tulip Interfaces

Jan 2026 – Present

Boston, MA

Architected load testing infrastructure using K6 and Ironhorse frameworks for full product coverage
Built synthetic data generation pipelines modeling real customer usage patterns across enterprise deployments
Rebuilt API client libraries and comprehensive test suites, improving developer velocity and test reliability

TPM / Software Engineer — Tulip Interfaces

Jul – Dec 2025

Boston, MA

Built FlowNode: visual DAG automation builder with 20+ custom node types (React, ReactFlow, TypeScript)
Integrated Jira, Slack, and Google Sheets APIs for cross-platform workflow orchestration
Managed LTS 15 release cycle: coordinated 6 engineering teams across 200+ Jira tickets

Senior Escalation Engineer — Tulip Interfaces

Oct 2023 – Dec 2025

Boston, MA

Managed \$10M–20M+ ARR enterprise accounts: Generac, Milwaukee Tool, DMG Mori, Tiffany & Co.
Primary engineering liaison bridging Customer Success and Engineering organizations (50+ engineers)
Drove proactive issue resolution across \$70M ARR customer base, directly reducing enterprise churn

Customer Support Engineer I → II — Tulip Interfaces

Nov 2021 – Oct 2023

Boston, MA

- Scaled support engineering team from 3 to 8 engineers while maintaining response quality
- Resolved complex application logic, connector integration, and performance issues
- Promoted through 3 tiers to highest escalation level within 2 years

Founder & CEO — Head of Product & Design — Bubble Holographic Systems

2017 – Present

Remote

- Designing 3D visual programming language with recursive namespace system (Bubbles, Slots, Wave Graphs)
- Authored 78-page Honors Thesis at Brandeis University on VR programming interfaces
- Building premium 3D creative marketplace with visual code library (Biblo Codebase)
- Managing engineering partner on compiler and runtime implementation

EDUCATION

Brandeis University — BA, Computer Science (Honors Thesis)

2017 – 2021

Waltham, MA

- Thesis: "Bubble: An Interface for Programming in Three-Dimensional Virtual Reality Environments"
- Advisors: Harry Mairson, Timothy Hickey, Antonella Di Lillo

SKILLS

LANGUAGES

TypeScript JavaScript Python SQL mongosh

FRONTEND

React Next.js ReactFlow D3.js MUI Tailwind CSS

BACKEND & APIS

Node.js REST APIs GraphQL

INFRASTRUCTURE

MongoDB PostgreSQL Docker

Jira API

Slack API

Google Sheets API

K6

Vite

Vercel

CI/CD

Git

PROJECTS

FlowNode — Visual DAG workflow automation builder with 20+ node types

github.com/aaronstone2/flownode

Service Graph Visualizer — Microservice dependency analysis with toxic injection & load test simulation

github.com/aaronstone2/kraken-unchained

Bubble Programming Language — 3D visual programming ecosystem for VR environments
